**Architecture**  
**Interior Design**  
**Landscape Design**  
**Sustainability**

At Nightingale Associates, our passion is to deliver creative educational environments that transform lives by inspiring children & young people to think, interact and succeed.

## **Design Ethos**

From visual inspiration, identity and flexibility to efficiency in construction, enhanced operation and the ease and cost of maintenance and sustainability – our innovation can take many forms.

We use architecture as a lever to improve motivation, behaviour and performance. Our design approach is informed by research into the physiological and psychological affects of colour, light, sound, sight, touch and smell which, when applied to a learning environment, allows the design solution to respond to the sensory stimuli and positively engage learners and teachers.

## **Community and Identity**

We are committed to developing designs that work in harmony with the community around them.

Our buildings invoke pride and identity, resulting in an inclusive, safe and welcoming environment that makes every visitor feel special and involved.
